EXPERIENCE

Software Developer | LelaTech/Endubis

Present – 6/2024

- Spearheaded collaboration with backend engineers and designers delivering high-quality software solutions that exceeded project requirements and expectations by **50%**
- Utilized **TypeScript**, **Next.js**, and **Mantine** to create UI components for a blockchain wallet app tailored to **10+** African Countries
- Developed and integrated **Blockchain** services and resolvers, enabling real-time data fetching and updating, reducing user-reported issues by 35% and improving system responsiveness by 20%

Intern Developer | Escalate

07/2024 – 09/2024

- Team lead for a group of 5 in building a fully-functional bank dashboard with **10+** pages.
- Integrated RESTful APIs to a Next.js application and implemented server-side rendering (SSR) and static site generation (SSG) in Next.js, optimizing performance and ensuring faster load times for end users

Freelancer | Upwork

Present – 09/2023

- Leveraged front-end skills into delivering **5+ Pixel Perfect** client projects.
- Collaborated with tons of developers from all over the world to build a complex web based game.

EDUCATION

Addis Ababa Science And Technology University - Software Engineering

09/2022 – 11/2027

ALX(1 year program) - Frontend Engineering

04/2023 – 06/2024

A2SV - Spent 1000+ hrs learning Data structures and Algorithms and solved 600+ questions on Leetcode and Codeforces

TECHNICAL SKILLS

Programming Languages | JavaScript, TypeScript, Python, HTML, CSS, SQL

Technologies | NextJS, React, Tailwind CSS, Bootstrap, REST API, MongoDB, MySQL, NodeJS, ExpressJS, Redux

Developer Tools | Git, GitHub, GitHub Actions, VSCode, Jest, Cypress

PROJECTS

HumorHive | Full-Stack Development

11/2023 – present

- Elevated frontend performance with **NextJS**'s server-side rendering and **TypeScript**'s type safety to optimize forum page loads and maintain code integrity.
- Achieved a **23%** improvement in initial render speed for improved user experience
- Architected a scalable backend system with **Appwrite**, establishing a resilient backend infrastructure, streamlining development processes, and facilitating rapid scalability
- Revamped forum search and filtering with polished database queries, resulting in a **7%** reduction in query response times for heightened user contentment

Inxtract | Front-end Development

07/2024 – present

- Orchestrated the development of an **AI** research summarizing application utilizing **NextJs**, **.Net**, and **Tailwind**,
- Streamlined the integration of a **C# .Net** backend, enhancing efficient storage and retrieval of AI summarized data, collaboration feature, and reviews, leading to a seamless user experience.
- A project that got **1st place** against **54** other brilliant teams in A2SV's Internal Hackathon

SoundRig | Front-end Development

06/2024 – Present

- Built the user interface for an app with **5,000** active concurrent users.
- Integrated beautiful animations to create a visually appealing and smooth user journey with a conversion rate of **20%**.
- Developed custom authentication flows, ensuring secure and seamless user access.
- Handled complex **20+** backend blockchain endpoints for real-time data interaction.
- Designed and implemented a high-conversion landing page to boost user engagement.
